DISCLAIMER AND COPYRIGHT

The American Gas Association's (AGA) Operations and Engineering Section provides a forum for industry experts to bring collective knowledge together to improve the state of the art in the areas of operating, engineering and technological aspects of producing, gathering, transporting, storing, distributing, measuring and utilizing natural gas.

Through its publications, of which this is one, AGA provides for the exchange of information within the gas industry and scientific, trade and governmental organizations. Each publication is prepared or sponsored by an AGA Operations and Engineering Section technical committee. While AGA may administer the process, neither AGA nor the technical committee independently tests, evaluates or verifies the accuracy of any information or the soundness of any judgments contained therein.

AGA disclaims liability for any personal injury, property or other damages of any nature whatsoever, whether special, indirect, consequential or compensatory, directly or indirectly resulting from the publication, use of or reliance on AGA publications. AGA makes no guaranty or warranty as to the accuracy and completeness of any information published therein. The information contained therein is provided on an "as is" basis and AGA makes no representations or warranties including any expressed or implied warranty of merchantability or fitness for a particular purpose.

In issuing and making this document available, AGA is not undertaking to render professional or other services for or on behalf of any person or entity. Nor is AGA undertaking to perform any duty owed by any person or entity to someone else. Anyone using this document should rely on his or her own independent judgment or, as appropriate, seek the advice of a competent professional in determining the exercise of reasonable care in any given circumstances.

AGA has no power, nor does it undertake, to police or enforce compliance with the contents of this document. Nor does AGA list, certify, test or inspect products, designs or installations for compliance with this document. Any certification or other statement of compliance is solely the responsibility of the certifier or maker of the statement.

AGA does not take any position with respect to the validity of any patent rights asserted in connection with any items that are mentioned in or are the subject of AGA publications, and AGA disclaims liability for the infringement of any patent resulting from the use of or reliance on its publications. Users of these publications are expressly advised that determination of the validity of any such patent rights, and the risk of infringement of such rights, is entirely their own responsibility.

Users of this publication should consult applicable federal, state and local laws and regulations. AGA does not, through its publications intend to urge action that is not in compliance with applicable laws, and its publications may not be construed as doing so.

This document is the cumulative result of years of experience of many individuals and organizations involved in measurement of natural gas. However, changes to this document may become necessary from time to time. If changes to this document are believed appropriate by any person or entity, such suggested changes should be communicated to AGA by sending them in writing with complete contact information, comments, and suggested changes to: ***Operations & Engineering Section, American Gas Association, 400 North Capitol Street, NW, 4th Floor, Washington, DC 20001, U.S.A.***

ACKNOWLEDGEMENT

This White Paper on Natural Gas Measurement Technician Training and Development Guidelines was developed by a Task Group of the American Gas Association's Transmission Measurement Committee under the chairmanship of **Bradley G. Massey** with the Southern Star Central Gas Pipeline, Inc. and the co-chairmanship of **John R. Hand** with the Spectra Energy Corp.

Other individuals who made considerable contributions to the revision of this document are:

Jim Witte, El Paso Pipeline Group
Dannie Mercer, Atmos Energy Corporation

Other individuals who also contributed to the revision of the document are:

Dan Rudroff, Welker Flow Measurement Systems Inc.
Walt Seidl, Colorado Engineering Experiment Station
Matt Holmes, ONEOK
R. Ron Carnahan – Oklahoma Natural Gas

AGA acknowledges the contributions of the above individuals and thanks them for their time and effort in getting this document revised.

Christina Sames
Vice President
Operations and Engineering
American Gas Association

Ali Quraishi, Staff Executive
Engineering Services Director
Operations and Engineering
American Gas Association

Scope

This document is intended to define a comprehensive list of tasks including the minimum knowledge, skill and time requirements to develop necessary competence for measurement field personnel.

Individual companies utilize personnel for a variety of measurement responsibilities and may have to customize the use of this list in their training and skill development programs to adequately develop personnel within their organizations.

Background

Currently, natural gas distribution and transmission companies are facing new challenges maintaining adequate training regimes that produce measurement technicians with the skills and competencies required to perform measurement tasks safely and effectively. Workforce dynamics and advances in measurement technology challenge companies to provide adequate training opportunities necessary to produce competent technicians. Technical personnel continue to exit the measurement discipline at an increasing rate through retirement or other opportunities.

Development programs, which include aptitude recognition, knowledge, and skill progression, should be structured to improve the retention of existing and newly hired technicians. These programs need to provide for expeditious and comprehensive qualification of technicians.

Choosing the Right Candidate

Selecting a candidate that has the pre-requisite skills and aptitude for fulfilling the requirements of a measurement technician can be difficult if the responsibilities of the position are not fully considered.

Some of the pre-requisite skill areas and aptitudes that should be considered are:

- Ability to Work Independently
- Analytical and Troubleshooting
- Chemistry
- Computer
- Electrical/Electronics
- Interpersonal Communication
- Mathematics
- Mechanical
- Physical Capabilities
- Reading and Comprehension of Technical Documentation

Candidates must be made aware of and understand the importance of the measurement technician's role in operating and maintaining the equipment related to safe, reliable, and accurate gas measurement.

Technician Development

It is desired that a new technician be exposed to a variety of experiences that fulfill development objectives at a satisfactory pace and meet the requirements of the position. A balanced program that incorporates computer based, classroom, formalized hands-on, and on-the-job training may be utilized. Gas property and measurement technology training is better suited for computer based modules and classroom instruction. However, skill development through exposure to actual field experiences cannot be simulated in classroom or computer based training. For example, reacting to pressure control requirements of a specific pipeline system cannot be taught, except at a field location. Confidence and proficiency should be gained through both classroom and real life experiences.

Development Program

A properly designed training program should include:

Program Considerations

- Complements Company Safety Initiatives
- Simple Relationships to the Work Environment
- Clearly Defined Objectives
- Sustainability and Continuity of Material
- Formal Structure with Pre-Requisites
- Instructor Qualifications
- Management of Change for Training Materials

Instruction

- Computer Based Training (CBT)
- Lecture/Formal Interaction
- Laboratory/Hands-On
- Field Experience (OJT)
- Equipment Specific Training
- Mentoring Programs

Comprehension

- Pre-Testing/Evaluation
- Post-Testing/Evaluation
- Skill Demonstration

The table in the following pages may be used as a training guide that would be a precursor to the demonstration of competence. Competency is defined here as the ability to safely and proficiently execute tasks without supervision. The table lists a series of tasks that are considered to be relevant to the operation of measurement facilities. The tasks are categorized as either Base knowledge (B) or Advanced knowledge (A). A recommended minimum and an expected maximum number of training and skill development hours required to reach competency are listed for each task. Skill development hours represent time spent on the job to develop proficiency. Each company should evaluate the listed tasks to determine the appropriate number of hours required to reach competency (training and/or skill development) for their specific measurement job description. Again, the ranges provided below are estimates; it is left to each company's discretion in establishing an effective training and competency program.

MEASUREMENT TASKS Basic Level

	Level B = Base A = Advanced	Recommended Minimum Training Hours	Estimated Maximum Training Hours	Recommended Minimum Skill Development Hours	Estimated Maximum Skill Development Hours
FUNDAMENTALS & STANDARDS OF GAS MEASUREMENT	B	28	36	0	0
FUNDAMENTALS OF CODE & SAFETY COMPLIANCE	B	24	32	0	0
AUDIT METER STATION FACILITIES	B	24	32	40	80
CALCULATE & REPORT UNMETERED GAS USAGE	B	8	16	8	16
CHANGE METER STATION STATUS (active, inactive, unavailable, abandoned)	B	2	4	2	4
CHANGE, INSPECT & SIZE ORIFICE PLATES	B	8	16	8	16
CLEAN & INSPECT METER TUBES	B	8	12	8	16
COLLECT GAS SAMPLES	B	4	8	8	16
CONDUCT LENGTH OF STAIN TUBE TEST (All Required Quality Tests)	B	2	4	8	12
CONFIGURE METER STATION ALARM SETTINGS AND/OR SHUT-IN VALVES	B	8	16	16	24
COORDINATE METER STATION ABANDONMENT	B	4	8	4	8
DIVERT & BYPASS METER STATION GAS FLOW	B	8	12	8	12
ELECTRONIC FLOW MEASUREMENT (EFM) DATA COLLECTION	B	2	4	4	8
GAS QUALITY SHUT-IN AND MONITORING	B	16	24	12	16
INSPECT, TROUBLESHOOT & REPAIR PRESSURE REGULATOR (Worker Device)	B	24	40	36	64
INSTALL & CONFIGURE EFM HARDWARE & SOFTWARE	B	4	8	8	12
INSTALL & MAINTAIN DC POWER SYSTEMS	B	4	8	8	16
INSTALL & TEST CHROMATOGRAPHS	B	8	16	16	32
MAINTAIN & REPAIR CORIOLIS METERS	B	8	16	8	16
MAINTAIN & REPAIR ORIFICE FITTINGS	B	12	24	20	40
MAINTAIN & REPAIR CHROMATOGRAPHS	B	16	32	16	32
MAINTAIN & REPAIR ULTRASONIC METERS	B	16	32	8	16
MAINTAIN & REPAIR POSITIVE DISPLACEMENT METERS	B	16	24	16	24
MAINTAIN & REPAIR TURBINE METERS	B	16	40	4	8
MAINTAIN & TRANSPORT COMPRESSED GAS CYLINDERS FOR ON-LINE ANALYZERS	B	2	4	2	4
MANAGE EFM ALARMS AND LIMITS	B	8	16	16	24
MANAGE GAS PROPERTY AND L&U ZONES	B	8	12	8	12
OPERATE & MAINTAIN ELECTRONIC CORRECTORS	B	8	12	16	24
OPERATE & MAINTAIN GAS SAMPLERS	B	4	12	4	12
OPERATE & MAINTAIN GAS SEPARATOR	B	8	16	8	16
OPERATE & MAINTAIN PORTABLE GRAVITOMETER	B	4	8	12	16
OPERATE & MAINTAIN STATION/CATALYTIC INSTRUMENT HEATERS	B	2	4	2	4
OPERATE, INSPECT & MAINTAIN BYPASS/WICK ODORANT SYSTEM	B	4	8	8	16
OPERATE, INSPECT & MAINTAIN INJECTION ODORANT SYSTEM	B	8	16	8	16
OPERATE & MAINTAIN INSERTION/CLAMP-ON METERING DEVICES	B	4	6	4	8
OPERATE, TEST & MAINTAIN (O ₂) ANALYZERS	B	8	16	16	32
OPERATE, TEST & MAINTAIN CARBON DIOXIDE (CO ₂) ANALYZERS	B	8	16	16	32
OPERATE, TEST & MAINTAIN MOISTURE ANALYZERS	B	8	16	16	32
OPERATE, TEST & MAINTAIN SULFUR ANALYZERS	B	8	16	16	32

MEASUREMENT TASKS
Basic Level
(Continuation from previous page)

	Level B = Base A = Advanced	Recommended Minimum Training Hours	Estimated Maximum Training Hours	Recommended Minimum Skill Development Hours	Estimated Maximum Skill Development Hours
OPERATE, TEST & MAINTAIN VALVE ACTUATOR	B	8	16	8	16
PERFORM ODOROMETER TESTS	B	2	4	8	12
REVIEW & EDIT VOLUME DATA	B	8	12	8	12
REVIEW METER STATION DESIGN & CONSTRUCTION DRAWINGS	B	8	12	8	12
TEST & MAINTAIN TRANSMITTERS	B	8	16	8	16
TEST CONTROL VALVE	B	8	16	16	24
TEST METER OR WITNESS METER TEST	B	8	12	8	16
TEST PRESSURE REGULATOR (Worker Device)	B	8	16	16	24
TEST RELIEF DEVICES	B	8	16	16	24
TEST & MAINTAIN CHART RECORDERS	B	8	12	16	32
TRANSFER PROVE FIELD METERS	B	8	12	8	12
TUNE & ADJUST CONTROLLERS & POSITIONERS	B	12	24	12	16
Basic Level Total Hours:		456	810	550	984

MEASUREMENT TASKS
Advanced Level

	Level B = Base A = Advanced	Recommended Minimum Training Hours	Estimated Maximum Training Hours	Recommended Minimum Skill Development Hours	Estimated Maximum Skill Development Hours
BASIC TROUBLESHOOT & REPAIR REMOTE SCADA COMMUNICATIONS EQUIPMENT	A	16	32	32	64
CRITICAL FLOW PROVE FIELD METERS	A	4	6	8	24
INSPECT, TROUBLESHOOT & REPAIR CONTROL VALVES	A	12	24	16	24
INSPECT, TROUBLESHOOT & REPAIR RELIEF VALVE	A	8	16	16	24
RECOGNITION & DIAGNOSIS OF PULSATION AT METER STATIONS	A	8	16	16	40
TROUBLESHOOT & REPAIR CARBON DIOXIDE (CO ₂) ANALYZERS	A	16	32	16	32
TROUBLESHOOT & REPAIR CONTROLLERS & POSITIONERS	A	16	24	36	64
TROUBLESHOOT & REPAIR EFM HARDWARE & SOFTWARE	A	16	24	16	24
TROUBLESHOOT & REPAIR GAS SAMPLERS	A	8	16	8	16
TROUBLESHOOT & REPAIR MOISTURE ANALYZERS	A	16	32	16	32
TROUBLESHOOT & REPAIR OXYGEN (O ₂) ANALYZERS	A	16	32	16	32
TROUBLESHOOT & REPAIR SULFUR ANALYZERS	A	16	32	16	32
TROUBLESHOOT & REPAIR TURBINE METERS	A	8	12	8	24
TROUBLESHOOT & REPAIR ULTRASONIC METERS	A	12	24	24	40
TROUBLESHOOT AND REPAIR CHROMATOGRAPHS	A	16	32	40	80
TROUBLESHOOT, INSTALL AND REPAIR CORIOLIS METERS	A	8	16	8	16
TROUBLESHOOT & REPAIR POSITIVE DISPLACEMENT METERS	A	16	24	16	24
Advanced Level Total Hours:		212	394	308	592
Grand Total Hours (Basic + Advanced):		668	1204	858	1576
